Service come first*

www.NationwideWindow.com

“Well done is better than well said”

- *Energy Efficient*
- *Low Maintenance*
- *Great Looking*

If you want to enhance the appearance and value of your home, look no further. We offer an exclusive line of custom made replacement windows with our very own exclusive **Resistance® Glass System**, elegant entry doors, roofing and seamless siding.

All of our products are built to last and are backed by an on going commitment to excellence, the foundation of our success.

Our staff is one of the most knowledgeable in the industry; their goal is to help our consumers clearly understand the benefits of our products.

Resistance® Glass System Advantage

Save your energy dollars

The more BTUs your heating system has to create, the more your heating system turns on and the more out of pocket costs you have to pay your utility company. Measuring the actual amount of energy loss through BTUs provides a dramatic way to test exactly what different glass systems offer. Keeping your energy costs down is one of the prime goals for upgrading your windows.

Resistance® Glass System, Nationwide Exclusive

Resistance® Glass System is designed to keep your home warm in the winter and cool in the summer. **Resistance®** is the ideal solution for homes in climates that need windows with enhanced solar heat gain reduction for summer cooling as well as superb U-value performance for winter insulating efficiency. The result is increased energy efficiency and decreased utility bills.

Resistance® glass helps reduce condensation, and make your home much more resistant to outside noise. Condensation is greatly reduced because the glass is much warmer to the touch thus allowing no moisture to accumulate on the glass surface. Exterior sound transfer is diminished by almost 300% over single pane windows when using this newly created system.

Resistance® glass reflect the Ultra-Violet light that fades your carpets, drapes, furniture and photographs, allowing the beauty and warmth of natural light to shine through, while screening out the damaging rays.

More Viewing Area

Would you settle for less light? Do you have to sacrifice your view? Some very well known replacement window manufacturers use 7 inches of viewing space for the vinyl frame and sash horizontally and vertically. Would you believe that there are even a few who would take up to 9½ inches of this viewing area for their sash and frame. **Nationwide Windows** offer a more streamlined structurally superior sash and frame to give you **more glass viewing area!**

When compared to other vinyl windows on the market, a traditional 3 ft. by 5 ft. Nationwide Windows offer almost 2 square feet more viewing area.

Sunclean® Glass

All **Nationwide Windows** offer optional **SunClean®** self-cleaning glass. This exclusive ground breaking technology has the glass in your new windows coated with photo catalytic and hydrophilic properties that combine to result in windows that are easier to clean and stay cleaner.

The photo catalytic properties of the coated glass are energized by natural ultra-violet light. Surface dirt is slowly broken down so that water will sheet evenly over the glass instead of beading. This sheeting action helps to flush the surface clean and to accelerate drying, leaving your window glass with minimal spotting or streaking, effortlessly.

Superior Features

Our Nationwide Double Hung Window is truly a revolutionary design. This exclusive energy efficient window incorporates a high-density vinyl polymer weather seal over a raised leg on the true-sloped sill frame to block air and water infiltration. A full interlocking meeting rail, three pieces of heavy duty poly-nylon weather-stripping surround both sashes for ultimate protection against the elements. Foam filled frames and sashes add extra R-value to ensure warmth stays in your home in the winter and outside in the summer.

All Ultra Series Double Hung Windows offer recessed flush mounted cam-action locks that have keepers screwed in from the front of the window for added strength and beauty. Low profile tilt latches and ventilation limit locks along with a locking screen complete the package.

Available in a wide variety of decorator glass options, contour or flat grid patterns, interior and exterior colors and beautiful wood grains, giving you endless style choices.

Personalized Details

Nationwide Windows are the classic choice for most homeowners. Discerning buyers can maintain the traditional look of their existing windows while adding the benefits only Nationwide Windows can offer. Easy care vinyl windows do not require painting! They are easy to clean with tilt in sashes, and very energy efficient. There are many choices in grid patterns. Color is also available in choices of wood grain interior finishes and several exterior colors as well!

Expand your home's visual presence with a new Nationwide Bow or Bay feature window. These windows add architectural interest and fill the interior of your home with natural light. A custom Bay or Bow window will enhance the newly finished look of your home for a moderate investment. A Garden Window in your kitchen is another popular way to add interest.

Exclusive Custom Double Hungs and Sliders

Premium Materials

Nationwide has been making vinyl windows for over 25 years. Don't be fooled by terms like New Generation or new uPVC. All vinyl is made using formulas that control its quality, strength, color and shape. Nationwide Windows use a higher titanium vinyl blend to make our sashes and frames look like finely crafted pieces of ceramic. Nationwide Windows use only premium quality AAMA certified vinyl extrusions with a streamlined design that out performs the competition. This is why Nationwide allows you to have a beautiful window that exceeds the industry standards in all testing while providing the greatest viewing area possible.

Dramatic Nationwide Ultra Bows & Bays

Nationwide Ultra Series Bay and Bow windows are big, beautiful and very energy efficient. These windows add visual depth and dimension and fill your rooms with light. Ultra Series Windows have incorporated narrow sight lines and our trademark beveled exterior frame. Weather-stripping creates long term air and water infiltration protection.

All bay or bow windows are available in double-hung or classic casement styles with a wide variety of designer glass options or grid patterns. All hardware is color matched, and is designed

for high security and ease of operation. To compliment your interior and exterior home design, Nationwide Windows feature our custom color palette. Bay or bow windows can be ordered with pre-stained head and seat boards to match the optional wood grain finishes. Also including insulated head and seatboards to give greater comfort and reduce utility bills.

Nationwide Entry Doors

The first thing people notice about any house are the doors. Chipped, warped, out of style, the wrong style. What does your door say about you?

Now there's an easy way to improve the looks, security and energy efficiency of your home. Choose from our extensive selection of entry and patio doors.

Available in flush, 4, 6 and 9 panel door styles.

Accepts a variety of standard door lites.

- ❖ **Energy Efficient** fully insulated with an inner core of environmentally friendly polyurethane foam for a R-value of 13.0, more than four times that of a wood door.
- ❖ **Two-Piece Unitized Construction** for durability and strength. The heavy 22 gauge hot-dipped galvanized steel is 50% thicker than a standard steel door found at many home centers.
- ❖ **Adjustable Riser** can be easily aligned with a screw driver to meet the weather strip on the bottom of the door to create a tight weather seal.
- ❖ The slide-on **Six-Fin Bottom Sweep** seals out the weather and can be easily replaced.
- ❖ The **Steel Frame** provides the highest security rating in the industry.
- ❖ **Stainable Steel Doors** have a classic wood grain texture deeply embossed directly into the steel facing, matching the architecturally correct style of real oak. A special top coating accepts stain to provide a real wood look.
